

OSIS

Offshore/Onshore Safety Integrated System

OSIS is a streamlined system designed to issue electronic Safety Passports to third party contractors, ensuring all HSSE training, competency and fitness to work requirements are duly met.

This ensures work is done with a peace of mind.

Contractor Management PAIN. Sounds Familiar?

Application Process

- Painfully manual uploads of Fitness to Work and BOSEIT certifications.
- 2 week long application process, verifying certificates and issuing Offshore Safety Passport.

Approval & Reporting

- Time-consuming manual verification for each application to prevent fraud.
- Scattered data for verifying contractor information.

Logistic Booking

- Manual input for Medical, HSE Mandatory trainings and OSP Card validity in booking form.
- No single source of truth for medical, training, and certification expiry status. Need to chase down information from multiple databases.
- Contractor forgot to bring their OSP smart card for mobbing? Denied boarding and there goes your manpower planning.

Contractor Management Streamlined with OSIS

Fast Safety Passport Approval

- Quick and easy application and approvals process.
- Detailed audit trail for every action.
- Handy email reminders for Safety Passport expiry & status changes.

Easy Endorsement & Approval

- Integrated data from Malaysia's MySDS for training and fitness to work (FTW) requirements.
- Email notifications for every step of the endorsement and approval process.

Hassle Free Logistics

- Verify HSE requirements before booking.
- Seamless integration with logistic systems.
- Contractors only need their NRIC card for ID verification.

Insightful Reporting

- Customisable dashboards tailored to your needs.
- Easy report extraction for data analysis and audits.

OSIS Features

Offshore Safety Passport

Easily track, verify, and approve OSP applications right from your phone.

Contractor Competency Card

Get the right man for the right job. Extract and verify validity of training certificates and competencies through OSIS's integration with MPM's safety database system (MySDS).

Report & Dashboard

Easily view the status of your contractors Safety Passport and Competencies and instant reports that makes analysis and audits a breeze.

Contractor & Sub-Contractor Management

Contractor management is the feature provided to administrator to manage all the contractor and sub-contractor registered in OSIS. The ID applications and contract award management is managed using this module.

KEY INTEGRATION

Malaysia Safety Database (MySDS)

Track BOSEIT certification and validity, fitness to work, and relevant competencies (e.g. scaffolding, welding) with MySDS

Contractor Management System (CMS)

Access contractor movement and safety violation history with OSIS

OSIS

POINT

Integrates directly with OSIS so you can start assigning tasks to your contractors instantly

Logistic Management System

Easily verify the validity of submitted applications before making travel arrangements

Fatigue Management System (FMS)

Work smart, not hard. Track contractor fatigue levels and optimize team resources to get the job done
